	U	1	Document ID	Issue Date	Pages	Title	Current OR
1	<input checked="" type="checkbox"/>	<input type="checkbox"/>	US 5830877 A	19981103	41	Producing biologically active peptide by admin. of naked polynucleotide -  to a host, esp. to skin or mucosa, useful for vaccination, suppressing  allergic response, treating age-related loss of immunity etc.	
2	<input checked="" type="checkbox"/>	<input type="checkbox"/>	US 5804566 A	19980908		Immunisation by admin. of naked polynucleotide encoding an antigen  - esp. an allergen, to a tissue with high content of antigen presenting  cells, also device for delivery polynucleotide to the skin	
3	<input type="checkbox"/>	<input type="checkbox"/>	US 5679647 A	19971021	45	Stimulating cytotoxic T lymphocytes reactive with tumour-associated  antigen - comprises administering naked polynucleotide, encoding  homologous and-or heterologous tumour-associated antigen, to mammalian  host tissue	
4	<input type="checkbox"/>	<input type="checkbox"/>	WO 9728259 A1	19970807	1	Recombinant vector containing immunostimulatory palindromic polynucleotide  - useful for selectively enhancing the TH1 immune response in a host,  whilst reducing the risk of anaphylaxis	

	U	1	Document ID	Issue Date	Pages	Title	Current OR
5	<input checked="" type="checkbox"/>	<input type="checkbox"/>	US 5849719 A	19981215		<p>Treating allergic asthma by gene therapy with nucleic acid encoding</p> <p>antigen - delivered to antigen-presenting cells in skin and mucosa</p> <p>and expressed only intra-cellularly, inhibits both immunoglobulin</p> <p>E and late-phase interleukin synthesis</p>	
6	<input checked="" type="checkbox"/>	<input type="checkbox"/>	EP 930893 A1	19990728		<p>New immunomodulatory compositions - comprising an antigen conjugated</p> <p>to a polynucleotide that contains an immunostimulatory sequence</p>	
7	<input type="checkbox"/>	<input type="checkbox"/>	WO 9855495 A2	19981210	1	<p>Immunostimulatory oligonucleotides regulate the immune system - and</p> <p>contain an immune-stimulating octanucleotide sequence; for treating</p> <p>cancer, allergic and infectious diseases</p>	
8	<input checked="" type="checkbox"/>	<input type="checkbox"/>	WO 9911275 A2	19990311		<p>Reducing antigen-stimulated granulocyte-mediated inflammation</p>	
9	<input type="checkbox"/>	<input type="checkbox"/>	WO 200020039 A1	20000413	1	<p>Immunostimulatory oligonucleotide adjuvant induces mucosal immunity to an</p> <p>antigen in a mammalian host through production of secretory</p> <p>immunoglobulin A</p>	

	U	1	Document ID	Issue Date	Pages	Title	Current OR
10	<input checked="" type="checkbox"/>	<input type="checkbox"/>	WO 200021556 A1	20000420		Anti-HIV composition comprises immunostimulatory polynucleotides and HIV  glycoprotein gp120 useful for modulating, stimulating an immune response  against HIV in an HIV infected individual	
11	<input checked="" type="checkbox"/>	<input type="checkbox"/>	WO 200062787 A1	20001026		Enhancing antigen-presentation capabilities of T-cells for cancer  immunotherapy, by contacting cells with an immunostimulatory  oligonucleotide
